MEMORANDUM FOR: Director of Logistics

25X1A5a1

SUBJECT: Request for Task Order Assignment to
Contract 630, with the [REDACTED]
of [REDACTED]

25X1A5a1

1. This program is identified as RDD Project 7062, Cable Probes, and is not shown as an item of the current fiscal year budget. The requirement for this present effort stems from the need to extract a workable piece of equipment, which may be tested under a variety of environmental conditions. Under the terms of a previous contract, this Office had developed a special electromagnetic sensor which was successfully tested under limited environmental conditions. It is now desired that further investigations be conducted, leading to a device which may be used in physical locations where there are significant levels of electrical noise and interfering signals.

2. These new requirements have been discussed with [REDACTED] and the technical specifications were submitted to the [REDACTED]. The proposal submitted by the [REDACTED] describes their concept of a device which appears to most closely meet our requirements. They have made a careful study of the known problem areas and have allowed sufficient engineering time to effect workable solutions. The [REDACTED] proposal was priced lower than [REDACTED]; however, their approach to the problem lacked a number of sophisticated features that were incorporated in the [REDACTED] design. My engineering staff has made a careful study of both proposals and consider [REDACTED] as the logical choice.
